E & OE November 2021. \*Fuel consumption figures are determined according to the WLTP test cycle. The fuel consumption you achieve under real life driving conditions and CO2 produced will depend upon a number of factors, including the accessories fitted after registration, variations in driving styles, weather conditions and vehicle load. Only compare fuel consumption and CO2 with other vehicles tested using the same technical procedures. For more information contact your local Opel Dealer. All diesel models feature BlueInjection. Vehicles with BlueInjection technology will need regular AdBlue® top-ups also between servicing requirements. An indicator integrated into the on-board computer will warn you when you need to top up. More information see [www.opel.ie/adblue](http://www.opel.ie/adblue). In accordance with regulations R (EC) No. 715/2007 and R (EC) No. 692/2008 (in the versions respectively applicable).

# ALL-NEW MOKKA-e PERFORMANCE

## Single-speed electronic drive selector

As the motor is an all-electric single-speed drive unit, there is no need for multiple gears. Instead, the shifter lets the driver select from the following:

- Park
- Reverse
- Neutral
- Drive
- Braking (for increased regenerative braking)

## Drive Mode Selector

The driver can determine the driving style through selecting one of the following modes:

- Sport: for a dynamic drive with a responsive throttle and the highest top speed and torque.
- Normal: for a balanced drive that offers a compromise between performance and energy efficiency
- ECO: for maximum range and energy efficiency. The ECO mode deactivates all unnecessary energy-consuming features and reduces the top speed, torque and overall performance.

## Charging

The Mokka-e's charging flap's Padlock LED lights up when the cable is correctly plugged in and locked and then acts as a user interface to show the charging status via coloured LED lights:

- White: welcome light that helps to light up the area, especially useful in dark conditions
- Flashing green: charging in progress
- Solid green: charging complete
- Solid blue: delayed charging toggled; changes to flashing green when charging commences
- Solid red: malfunction

The driver may also choose from two settings:

- Immediate charging (the standard setting): Starts charging as soon as the vehicle is docked for charging;
- Delayed charging: This is especially useful for when cheaper electric rates are desired, e.g. charging at night. Simply enter a charging start time.

PERFORMANCE	MOKKA-e
Maximum power kW / bhp	100 / 136
Maximum torque Nm / lb. ft.	260 / 192
Acceleration 0 - 100km/h (secs)	8.7
Maximum speed kph	93
Maximum speed km/hr	150
Transmission	Automatic electric drive with fixed gear ratio
Service interval	1st year 12,500km inspection; then every 2 years/25,000 km
Electric range	324km

BATTERY	MOKKA-e
Battery energy kWh	50
Battery consumption (Combined low/high)	17.4-17.8kWh/100km
Battery warranty	8 years/160,000 km / 70% capacity
Domestic Wallbox – Accelerated charger 7kW	7 h 35 min (0-100% battery capacity)
Public Charging – Accelerated charger 22kW	5hr 05 min (0-100%)
Rapid Charger 50kW	45 min (15-80%)
Rapid Charger 100kW	30 min (15-80%)
